An Important Caveat

Making eBooks from PDF files created with different page layout software by different designers with different fonts inherently creates a real challenge: conversions are almost never perfect. The only way to ensure a perfect conversion is to do a line-by-line proofreading of the converted file against the original. While we perform a long list of quality checks on each title converted, we do not proofread line-for-line unless specifically requested by the publisher. We highly recommend that eBooks created from printed originals be proofread line-for-line, because those conversions have much higher error rates. Books that we typeset here at BookMobile will have fewer conversion errors because of the way we've set up our workflow. Line-for-line proofreading services are charged in addition to our base conversion and Comprehensive Quality Check services.

What now?

Do you need distribution?

BookMobile requires at least five titles in order to set up distribution. If you have five or more titles, contact Jeanne Weinkle at jweinkle@bookmobile.com.

Don't have 5 or more titles?

You can set up distribution as an individual. For Amazon, google "Amazon Kindle Direct Publishing." For the rest of the eBook resellers, please check their websites.

WHAT BOOKMOBILE HAS CHECKED & VERIFIED

- Checked link, footnote, and Table of Contents functionality
- Reviewed basic formatting against the original PDF
- Scanned for character conversion and diacritical issues
- Evaluated charts, graphs, and images for quality
- Ensured treatment of tables is optimal
- Ensured thumbnail cover images rendered properly
- Checked eISBNs
- Verified the metadata is included in ePub
- Reviewed the ePub in Adobe Digital Editions, on the Kindle, and on the iPad
- Ran through a checklist of issues that cause problems with particular eBook resellers
- Validated with multiple ePub checking tools—essential for distribution to resellers!
- Implemented any special checking requests from the publisher
- Fixed any issues discovered during the processes listed above
